#### Email

unver.jsx@gmail.com

#### Address

1921 SK. 5/3 Elvan Mah.  
Etimesgut/ANKARA

### Expertise

Full Stack Developer

UI/UX Design

### Language

English

German

### Skills

My core technical proficiency spans JavaScript (ES6+) and TypeScript.

For frontend development, I am highly skilled in using React.js and Next.js. I manage application state effectively with Redux and handle navigation using React Router. My expertise extends to building user interfaces with HTML5, CSS3, SASS/SCSS, Tailwind CSS, and Bootstrap, always ensuring a Responsive Web Design approach.

On the backend, I leverage Node.js and Express.js to develop robust server-side applications. I am proficient in creating RESTful APIs and have experience with GraphQL for efficient data querying. My capabilities also include implementing secure authentication methods such as JWT (JSON Web Tokens) and OAuth.

I work extensively with databases, primarily MongoDB through Mongoose, and also have experience with PostgreSQL and MySQL. For version control and collaborative development, I utilize Git across platforms like GitHub, GitLab, and Bitbucket.

My practical experience in DevOps and deployment includes deploying applications on Heroku, Netlify, and Vercel, complemented by a basic understanding of Docker.

While my primary focus is development, I possess basic familiarity with Jest and React Testing Library for testing.

Beyond these, I am adept with essential development tools such as npm, Yarn, Webpack, and Babel, and regularly use Postman for API testing. My soft skills include strong problem-solving abilities, effective team collaboration, and a demonstrated capacity for rapid learning of new technologies.

### Experience

2022 – 2023

Benan Tut E-  
Commerce /Turkey

#### Frontend Developer

My first job experience in the IT sector began in mid-2022 as a JuniorReact Front-End Developer. As it was project-based, I worked therefor approximately 10 months, focusing entirely on front-end sitedesign.

2023 - 2024

turkafone.com.tr

#### Backend Developer

2024Developed and maintained scalable web applications using MERNstack technologies. Collaborated with cross-functional teams todeliver high-quality products on time and within budget.

2024- 2025

sanatkardan.com

#### Full Stack Developer

At Sanatkardan.com, I lead the full software development lifecycle, from initial design to deployment and ongoing maintenance. I build robust web applications, focusing on both frontend and backend development to deliver comprehensive, high-performance solutions. I also independently manage all aspects of website maintenance, including updates, bug fixes, and performance optimization, ensuring seamless and efficient operation.

### Education

2010-2015

Gazi University

#### Bachelor of Business Management

Gazi University | Ankara, Turkey Bachelor of Science in Economics | 2009 – 2015

My foundational education, including my university studies, was completed in Turkey.

### OBJECTIVE

As a dedicated Full-Stack Developer, I strive to excel in the global software industry by continuously enhancing my technical expertise and delivering innovative, high-quality solutions to drive organizational success. I aim to collaborate with diverse international teams, create impactful applications, and foster strong professional relationships while contributing to the tech community through knowledge-sharing and mentorship.
